DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 – 13 and 17, drawn to a magnetic sensor with magnetoresistive elements and heat generating elements, classified in class 324, subclass 224.
- II. Claim 14, drawn to a method for compensating a temperature-dependent characteristic of a magnetic sensor, classified in class 324, subclass 202.
- III. Claim 15, drawn to a magnetic sensor comprising a single substrate, classified in class 324, subclass 228.
- IV. Claims 16 and 17, drawn to a magnetic sensor including a substrate, and a control circuit section classified in class 324, subclass 249.

The inventions are distinct, each from the other because of the following reasons: Inventions (I and II) or (I and III) or (I and IV) or (II and III) or (II and IV) or (III and IV) are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as the magnetic sensor includes magnetoresistive elements and heat generating elements; invention II has separate utility such as the temperature dependent characteristic is being compensated; invention III has separate utility such as it includes the structure of the magnetic sensor and invention IV has separate utility such as the control circuit section is disposed inside the closed curve. Because these inventions are distinct for the reasons given above

and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or III or IV, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Scheer on 09/23/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Reena Aurora whose telephone number is 571-272-2263. The examiner can normally be reached on Monday - Friday, 7:00 - 3:30.
